

SOME SEE JUST A CABLE

WE SEE A DIGITAL TRANSFORMATION AT FULL SPEED

Why choose Scankab?

- Full-line supplier of cables and cable management systems for data centres
- Able to deliver wiring cables of highest class of fire safety (CPR)
- Able to deliver Black C8 cable management systems for data centres
- Cable management systems tested in accordance with international standards
- High delivery performance

FULL-LINE SUPPLIER OF OPERATIONAL RELIABILITY

With more than 25 years' experience, European manufacturing combined with warehouses in several central locations in Scandinavia, Scankab is the optimum supplier to data centres

A data centre, which stores sensitive information and makes stringent demands of operational reliability, consumes immense volume of electric power. This type of building requires the right cables, which safeguard the supply while providing maximum output in demanding circumstances.

In a digitalised world, there is no time for power failure
With Scankab as the manufacturer and supplier of cables and cable management systems, a future data centre will be sure of stable uptime and energy-efficient solutions. We have 25 years' experience in the cable business and are known for our professional service and carefully prepared complete solutions.

"The infrastructure required by the companies of the future will not entail the use of fewer cables. These are companies which will require immense volume of electric power. Scankab will secure the supply of that power."

**” Morten Rasmussen,
CEO, Scankab**

Reduce the risk of power outages with the right cable trays

BLACK C8 Minimise the risk of "zinc whiskers"

Choose cable trays from Scankab with a coating especially designed to prevent the phenomenon known as 'zinc whiskers'.

With the **BLACK C8**, IEC 61537 lattice cable tray, you can reduce the risk of short-circuits and consequent crashing.

EN 50575

"We assist you as a installation contractor, by advising and guiding you and your clients to ensure that you are receiving optimum protection against fire"

Søren Porse

Group Operations Manager, Scankab

Why should you chose cables from the highest classes of fire safety?

With B2ca and Cca wiring cables, the damage and the number of crashes and inconveniences caused by fire are minimised. These cables help prevent the development of smoke, drops of particles and pyroligneous acids.

SCANKAB SET OUT AS THE CABLE INDUSTRY'S ANSWER TO "GARAGE ROCK"

From the outset, Scankab was the rebel of the cable industry. The business sold cables from a small garage store room and challenged the cable market. Today, setting new industry standards is still part of Scankab's DNA. Scankab develops, manufactures and delivers quality cables and cable management systems for electrical installation jobs.
